

BHAGYA RATHNASEKARA

Community Operations Manager

Sri Lanka (GMT+5:30) · Remote · Available across AU, EU and US hours

bhagya.rth1203@gmail.com · linkedin.com/in/bhagya-rathnasekara · bgyeth.github.io · github.com/bgyeth

SUMMARY

Community operations manager with 3+ years running paid Telegram and Discord communities. Helped hold approximately **90% paid-member retention** through the 2023 downturn and cut repeat support requests by roughly **60%**. Builds the access control, onboarding and documentation systems behind dependable member operations.

EXPERIENCE

Community Operations Lead — Printers Lounge

October 2025 – Present · Remote · Private paid research community on Telegram

- Designed the paid-access system end to end: Stripe verification gating a single-use Telegram invite per member, removing reusable invite links.
- Took the community from validation to launch, then owned onboarding, member support, access review, moderation and escalation.
- Operated with no recorded phishing or unauthorized-access incidents since the October 2025 launch.

Community Operations Manager — Fast Launch Digital

August 2022 – May 2025 · Remote · Sole operator for a 500+ member paid crypto and finance education community

- Helped maintain approximately **90% paid-member retention** through the 2023 downturn by tracking engagement signals and flagging churn risk early.
- Helped reduce repeated support requests by roughly **60%** by building self-serve onboarding, searchable FAQs and pinned knowledge resources.
- Ran the entire operation solo across Telegram and Discord: access checks, onboarding, support, moderation, announcements and retention.
- Cut moderation inconsistency by documenting rules, access controls and escalation paths, backed by anti-spam tooling (Rose Bot).

Web3 Risk & Due Diligence Consultant — Freelance

October 2021 – August 2022 · Remote

- Delivered structured due-diligence reports covering teams, business models, tokenomics, roadmaps and security risk.
- Translated on-chain and technical findings into plain-English recommendations for non-technical investors.

PROJECTS

Telegram Public Channel Monitor (2026) · apify.com/bgy_1203/telegram-public-channel-monitor

Published a public Apify Actor reading one public Telegram channel per run via t.me/s, with no login or private-channel access. Companion n8n workflow adds scheduling, persistent state, cross-run deduplication, keyword filtering and Telegram alerts. One demonstrated run returned 100 structured records in 9 seconds.

CERTIFICATIONS

Digital Marketing — HubSpot Academy, 2026 · **Web3 Market Dynamics & Technical Analysis** — Udemy, 2023
