SUMMARY

Community Operations Manager with 3+ years running member operations for paid Telegram and Discord communities. Manages the member lifecycle across access, onboarding, support, moderation, documentation, retention work, and trust and safety. Helped maintain approximately 90% paid-member retention in a 500+ member community through the 2023 downturn; now leads operations at Printers Lounge and builds practical systems that make recurring work more dependable.

CORE CAPABILITIES

Community operations: member lifecycle · paid memberships · onboarding · support · retention · engagement · member education

Trust and safety: access control · member verification · moderation · anti-spam controls · escalation · incident response

Systems and tools: SOPs · FAQs · knowledge bases · Telegram · Discord · Notion · Stripe · Apify · n8n · GitHub

EXPERIENCE

Community Operations Lead · Printers Lounge · Remote · Oct 2025–Present

- Lead member operations for a private paid Telegram research community, covering payment verification, access, onboarding, support, moderation, research delivery, and escalation.
- Designed and launched the paid-access workflow by linking Stripe checkout to payment verification and single-use Telegram invitations.
- Maintain controlled access through verification, access rules, edge-case review, and escalation handling. No recorded phishing or unauthorized-access incidents since the October 2025 launch.
- Reduced repeated member and payment questions by turning recurring issues into clearer onboarding steps, access rules, and operating procedures.

Community Operations Manager · Fast Launch Digital · Remote · Aug 2022–May 2025

- Managed the member lifecycle for a paid crypto and financial education community with more than 500 members across Telegram and Discord.
- Helped maintain approximately 90% paid-member retention through the 2023 downturn by monitoring engagement signals, reviewing feedback, identifying churn risk, and working with leadership to adapt education and content.
- Helped reduce repeated support requests by roughly 60% through self-serve onboarding, a searchable knowledge base, and beginner-friendly education resources.
- Applied access controls, anti-spam tooling, documented moderation rules, and escalation paths while managing support, announcements, education, and day-to-day member communication.

Web3 Risk & Due Diligence Consultant · Freelance · Remote · Oct 2021–Aug 2022

- Produced structured due-diligence reports covering teams, business models, tokenomics, roadmaps, and security risks for private investors evaluating early-stage projects.
- Translated technical, tokenomics, and on-chain findings into plain-English recommendations and educational summaries for non-technical clients.

SELECTED INDEPENDENT PROJECT

Telegram Public Channel Monitor · Apify + n8n · 2026

- Published an Apify Actor that extracts structured messages from public Telegram t.me/s/ previews without login or private-channel access.
- Built a companion n8n workflow for scheduling, multi-channel orchestration, persistent state, cross-run duplicate prevention, keyword filtering, and Telegram alerts. One demonstrated run returned 100 structured records in 9 seconds.
